W11-P1: Make mobileBtn work correctly

The screenshot shows a browser window with the title "Vite + React". The URL is "localhost:5173/demoGetBlog_xx". The page content is a blog application. On the left, there's a sidebar with categories like "Home", "Mega menu +", "Blogs +", and "Blog". The "Blogs +" section is highlighted with a red box and contains a link "demo: SupaGetBlog". The main content area displays blog posts: "mid1: SupaBlog", "mid2: NodeBlogLocal", and "mid2: NodeBlogSupa". Below the sidebar, there are sections for "LIFE", "Sev", "Aware", "Contact", and "Read More". The right side of the screen shows a DevTools panel with the "Elements" tab selected. In the "Elements" panel, the "blogs data" section is expanded, showing an array of 9 objects. Each object represents a blog post with fields: id, title, and length. The first few posts are:

```
blogs data
  (9) [{}]
    0: {id: 1, title: 'Seven Reasons Why', length: 9}
    1: {id: 2, title: 'Travel To Paris', length: 9}
    2: {id: 3, title: 'Coffee Brings Fri', length: 9}
    3: {id: 4, title: 'Coffee Make You F', length: 9}
    4: {id: 5, title: 'Coffee Make You C', length: 9}
    5: {id: 6, title: '101 Tower In Taip', length: 9}
    6: {id: 7, title: 'Sun Rise From The', length: 9}
    7: {id: 8, title: 'Serene Lake With', length: 9}
    8: {id: 9, title: 'Rocks Of Queen He', length: 9}
```

At the bottom of the browser window, there's a "TANSTACK React Query v5" status bar showing metrics: 0 queries, 0 mutations, and 1 active subscription.

W11-P2: Use Postman to test GET /api/blogs, and DELETE /api/blogs/:id

The screenshot shows a Mac desktop with a code editor and a Postman application running in the background.

In the code editor (left side), the file `server_xx.js` is open. A specific line of code is highlighted:

```
app.get('/api/blogs', (req, res) => {
```

In the Postman application (right side), a GET request is being made to `http://localhost:5000/api/blogs`. The response body is displayed in JSON format:

```
[{"id": 7, "img": "/images/photo-7.jpg", "remote_img": "", "category": "travel", "title": "sun rise from the mountain", "desc": "Lorem ipsum dolor, sit amet consectetur adipisicing elit."}, {"id": 3, "img": "/images/photo-3.jpg", "remote_img": "", "category": "lifestyle", "title": "lifestyle title", "desc": "lifestyle desc"}]
```

The screenshot shows a macOS desktop environment with several open windows:

- Terminal:** Shows the command `node server_xx` running.
- Code Editor:** Shows the file `server_xx.js` with code related to a blog API. A red box highlights the section where a blog is deleted from an array.
- Postman:** An API request is being tested for the endpoint `http://localhost:5000/api/blogs/7`. The response body is JSON: `{"msg": "task removed"}`.
- System Dock:** Shows various application icons including Finder, Safari, Mail, and others.

96eb9a4 liangyu9103 Tue May 28 01:24:13 2024 +0800 ### W11-P2: Use Postman to test

W11-P3: Use Postman to test DELETE /api/blogs/clearAll, and POST /api/blogs/loadAll

=> test DELETE /api/blogs/clearAll

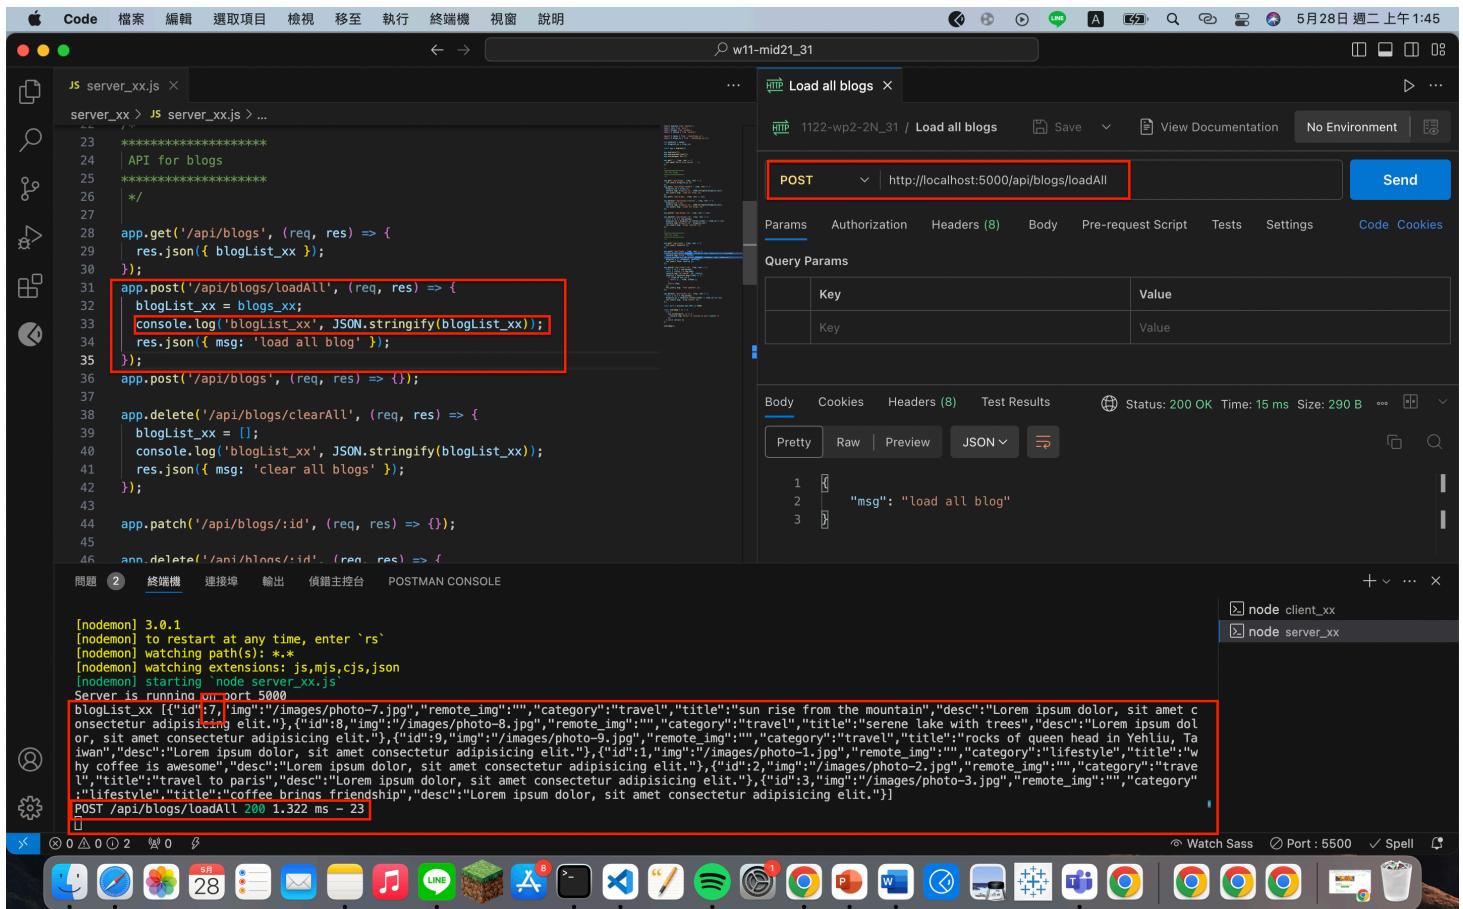

The screenshot shows a Mac desktop with several windows open:

- Terminal Window:** Shows the Node.js server running on port 5000. It logs the start of the server, the deletion of all blogs (DELETE /api/blogs/clearAll), and a restart due to changes.
- Postman Window:** A "Clear all blogs" collection is open. A specific request is shown with a red box around the code block:

```
app.delete('/api/blogs/clearAll', (req, res) => {
  blogList_xx = [];
  console.log('blogList_xx', JSON.stringify(blogList_xx));
  res.json({ msg: 'clear all blogs' });
});
```
- Response Preview:** The response body is displayed in JSON format:

```
1: { "msg": "clear all blogs" }
```
- Bottom Bar:** Shows various Mac application icons like Finder, Mail, and Safari.

=> test POST /api/blogs/loadAll

ab76c76 liangyu9103 Tue May 28 01:48:40 2024 +0800 ### W11-P3: Use Postman to test

W11-P4: Git logs of W11 and code

```
git log --pretty=format:"%h%x09%an%x09%ad%x09%s" --after="2024-05-27"
```
